Appendix K: Rules and Conditions Mapping	
1. Introduction	

## 1. Introduction

This Appendix K of the DDNA lists, all the Rules & Conditions [i.e. the Business transitions rules (Bxxxx), the Conditions (Cxxxx), the Technical transitions rules (Exxxx), the Guidelines (Gxxxx), the Rules (Rxxxx), the Sequencing rules (Sxxxx), the Technical rules (Txxxx)] and the exhaustive list of Data Group and Data Items on which they are applicable (with the full path provided).

Along with each combination of R/C, IE and TMS path, two validation values are provided, the "Validated by Sender" and "Validated by Recipient", with the following available values:

- R (Required validation by all countries)
- SR (Strongly recommended)
- N (Not allowed/applicable validation)
- '-' (No validation value is defined)

The selected "Validated by Sender" and "Validated by Recipient" value is applied to the specific IE and TMS path where the R/C is applied.

A validation value is not defined and a '-' (dash) is used:

1. to all Guidelines (Gxxxx), since they are not subject to automated testing and based on their definition, they only provide instructions on how to fill in the data groups and data items
2. to all Sequencing Rules (Sxxxx), since based on their definition, they only define in which order the Condition(s), Technical Rule(s) for Transition, Technical Rule(s) and Rule(s) must be validated
3. to all Business transition rules (Bxxxx), Conditions (Cxxxx), Technical transition rules (Exxxx), Rules (Rxxxx), Technical rules (Txxxx), since they are used in the External and National Domain messages, where the validation policy is defined nationally

Please note that this Appendix K is also available in XLSX file format, for further filtering and sorting.

The text of the Rules & Conditions is available in the Appendix Q2.

For more details the reader may refer to DDCOM section IV.3.1.1. Rules/Conditions Validation Principles for External Domain IEs.
